

SID SITTING NOTES:-

Simply sitting in front of SiD, usually at peak times, wearing a high viz jacket and giving thumbs up or friendly waves and smiles to drivers getting SiD's green smiley face and thank you message has a further measurable effect on drivers behavior...

Not only are we getting regular through drivers giving our SiD Sitting greeters the thumbs up and waving , even before the greeters do so, but we can measure a (roughly) further 10% reduction in speed.

Well done SiD Sitters!
